

GARMONIA, Ltd.

Is a fast developing Russian biotechnology company which has designed innovative peptide technologies for long and healthy life.

Over 50 products : food supplements and cosmesueticals are defended by 30 Russian and International patents

Mission:

“We work to add life to years and to make active and healthy longevity available to everyone “.

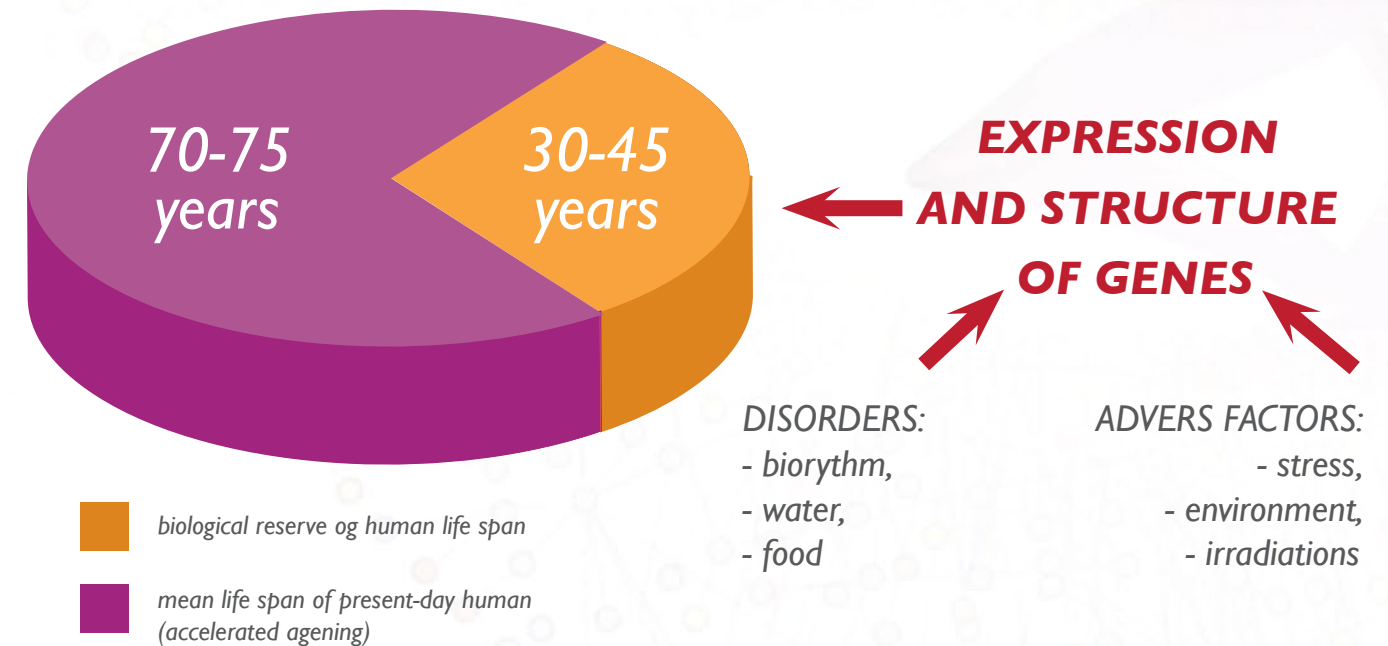

PEPTIDES ARE MOLECULES OF HEALTH, LONGEVITY AND SUCCESS

Strong science developed **over 35 years** underlies high value products targeting major indications with large markets.

By today the products were used by **over 15 million people** and contributed to improvement of brain, immune, cardio-vascular, respiratory, gastro-intestinal functions, enhancing human vital resource and improving life quality, reducing morbidity and increasing longevity.

Possibility to increase human life span
up to upper species limit
Biological reserve

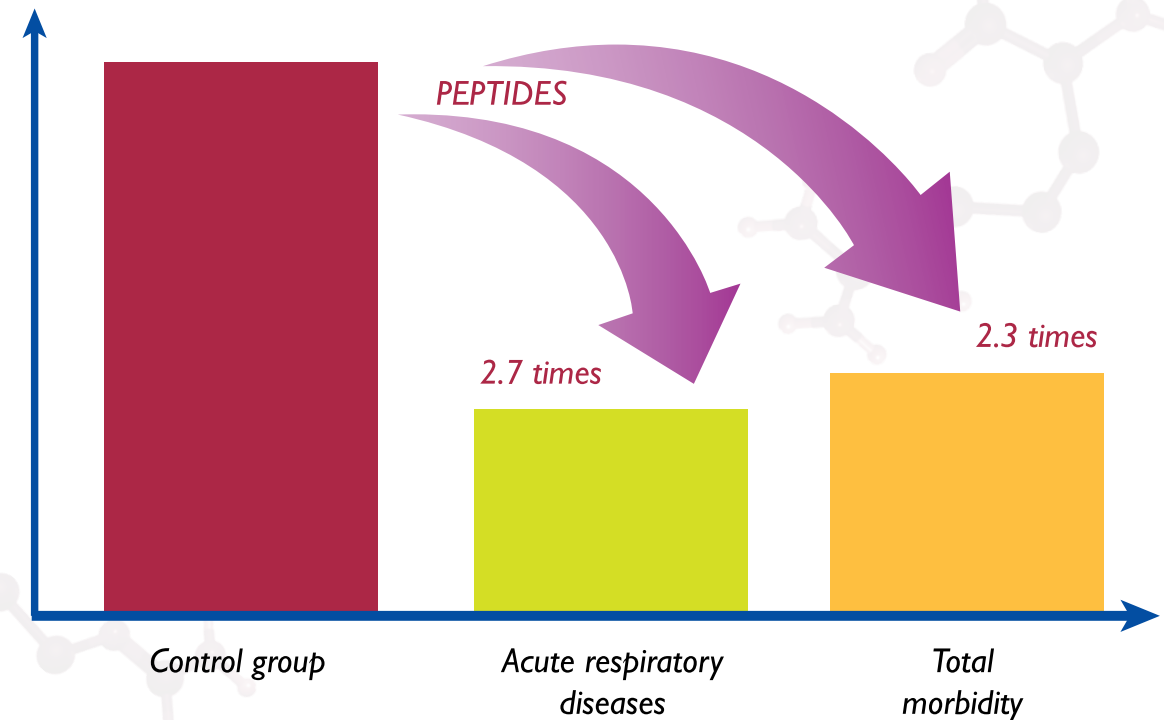

WHY PEPTIDES?

- SAFE!!!
- They play evolutionary biological role in the organism
- These small proteins are tissue-specific.
They easily target and prevent or/and arrest the problem
- They act as information molecules to trigger the process of self-restoration and rejuvenation
- They work as geroprotectors
- They enhance organism vital resource
- They help to resist adverse environmental factors
- They combat genetic problems
- They are complementary with genes

Peptides decrease human morbidity rate

The observation period – 1 year

Peptide regulation of protein synthesis (cell functions)

CYTOGENS

are natural biologically active food supplements on the basis of small peptides which normalize and maintain functions of various systems of human organism

CRYSTAGEN®
immune system

CHONLUTEN®
lungs and bronchi

OVAGEN®
liver and gastrointestinal tract

PINEALON®
central nervous system

CARTALAX®
bones and cartilage

VESUGEN®
cardiovascular system

A key role in the initiation of the biological activity of peptide is its interaction with DNA which provides genetic stability and a normalization of the age-related metabolic shifts.

CYTOMAXES

a new class of biologically active food supplements on the basis of natural extracts
Isolated organ specific peptides act selectively on different cells of organs and tissues, normalize metabolism in these cells and thus regulate the functions of corresponding organs

VENTFORT® vessels	VLADONIX® thymus	SVETINORM® liver	SUPREFORT® pancreas	ENDOLUTEN® pineal gland
SIGUMIR® cartilage and bone	CERLUTEN® brain	STAMACORT® stomach	VISOLUTEN® eyes	CHITOMUR® urinary bladder
PIELOTAX® kidney	TESTOLUTEN® testis	CHELOHART® heart	LIBIDON® prostate	ZHENOLUTEN® ovaries
GOTRATIX® muscle	BONOMARLOT® bone marrow	GLANDOKORT® adrenal gland	TAXOREST® bronchi	BONOTHYRK® parathyroid gland

The peptide bioregulators are recommended to enhance health, vital resource and life quality

COMPLIMENT

Cosmetic line

COMPLIMENT Regenerative

Contains physiologically active complex of thymus peptide, stimulate processes of tissue regeneration and synthesis of tissue specific proteins, facilitate skin cells renewal, produce anti-oxidant, immunity stimulating and anti-stress effect.

COMPLIMENT Reinforcing

Contains physiologically active complex of cartilage peptides, regulate metabolic processes in the connective tissue, reinforce collagen structure of the skin elastic fibers and enhance its turgor.

COMPLIMENT

Cosmetic line

COMPLIMENT Reinforcing

Contains physiologically active complex of vessels peptides, regulate metabolic processes in a vessel wall, restore disturbed microcirculation in the skin, reinforce and regulate permeability of skin vascular walls, improve skin turgor.

COMPLIMENT Reinforcing

Contains physiologically active complex of pineal peptides, normalize processes of lipid peroxide oxidation in skin cells, facilitate elimination of negative effects of environmental and internal factors on the skin, produce anti-stress effect

CONTAINS
A UNIQUE
PHYSIOLOGICALLY
ACTIVE COMPLEX
OF PEPTIDES
AND AN EXTRACT
OF GINSENG

Peptides are molecules of beauty and success

- **THYMUS PEPTIDES** stimulate processes of tissue regeneration and synthesis of tissue specific proteins, facilitate skin cells renewal, produce anti-oxidant, immunity stimulating and anti-stress effect.
- **CARTILAGE PEPTIDES** regulate metabolic processes in the connective tissue, reinforce collagen structure of the skin elastic fibers and enhance its turgor.
- **VESSELS PEPTIDES** regulate metabolic processes in a vessel wall, restore disturbed microcirculation in the skin, reinforce and regulate permeability of skin vascular walls, improve skin turgor.
- **PINEAL PEPTIDES** normalize processes of lipid peroxide oxidation in skin cells, facilitate elimination of negative effects of environmental and internal factors on the skin, produce anti-stress effect.
- **BIOACTIVE COMPLEX NEOVITIN®** — a complex of active components isolated by biotechnologically original method from the cells of ginseng biomass. Highly effective antioxidant. Produces anti-inflammatory and vitamin enriching impact, reinforces vascular walls, normalizes lipid and protein metabolism, optimizes the content of micro- and macro elements. Facilitates prevention of pre-mature skin ageing and protection from oxidative stress.

- Inhibits skin ageing
- Activates skin vitality and youth
- Eliminates negative effects of environmental factors on the skin
- Provides enhanced nourishment of skin cells
- Exerts a pronounced anti-inflammatory effect
- Improves skin elasticity and enhances face contours
- Improves skin vigor
